

You've wanted to fly for years and just didn't know where to go, who to talk to, and WHAT it is REALLY like to fly a plane? Here's a chance to do it all in just a couple of hours: our CalAir Cirrus Discovery Experience.

for only
\$325

You'll FLY 'left seat' (the Captain's seat) of a new Cirrus SR20, one of the safest, fastest, and most technologically advanced aircraft in the skies today.

Your highly experienced CalAir Certified Instructor will guide you through an exhilarating takeoff and climb as you soar above Los Angeles.

Suddenly, the Hollywood Sign, Downtown LA, Catalina, and the Pacific Ocean are visible in every direction, as if you can touch them.

And you'll see how easy it is to control the aircraft through an orientation in our Cirrus Aircraft Simulator prior to your flight.

Bring your significant other or a friend to share in this one-of-a-kind experience!

Call now to schedule your flight today!

Terms:

- Only available to first time Student Pilots
- Limit one course per Student Pilot
- Not applicable to student pilots who have taken their first lesson at CalAir in the Private Pilot Course
